STAT

Dear [Redacted]

I have been wanting to write to you for some time to let you know of the present position in regard to monitoring in the Baltic area. I am fully aware of the importance you attach to this project, and I know you are conversant with the problems which it has entailed at our end. As you know, we were all prepared to go ahead with a pilot scheme at Stockholm and the only thing that remained to be cleared was our Ambassador's agreement to provide accommodation for us there. We have since run into difficulties on this aspect of it but I am hopeful that these may ultimately be resolved. In case they should prove insuperable we have been thinking about alternative locations from which we might be able to carry out the operation. Of the various possibilities we calculate that Oslo may be the next best proposition, although we have not yet tested the site.

The situation therefore at present is that we are still trying to resolve the Stockholm difficulties, but at the same time we have asked our Foreign Office to make arrangements for us to test Oslo on the spot, and as soon as I hear that we can go ahead, I propose to have this done, so that at least we know what value we would get from Oslo as compared with the known potentialities of Stockholm. From this you will see that the project is still very much alive and we are doing our best to press on with it but, as I am sure you will yourself appreciate, Government departments do not move with the speed we would like and there are diplomatic as well as technical difficulties to be overcome.

I will of course keep you informed as to developments as soon as I have anything positive to report, and I will certainly let you know what our estimate of Oslo is when we have been able to make the necessary tests.

Yours sincerely,

J.T. Campbell
